TIMELESSLY BEAUTIFUL FACADES

Ideal for new-build and renovation projects
A sustainable and contemporary material, Cedral is ideal for renovations and new build projects and can be used across the whole or a part of your house, helping to create a stunning individual look to your home.

Hard as stone, workable as wood
Thanks to the multilayer fibre structure, the fibre cement planks combine the durability of stone with the design flexibility of wood.

The planks are available in a range of colours with a timber effect finish and a modern, textured look.

The DNA of Cedral

The natural origins of Cedral
Cedral facade is a high quality and durable fibre cement plank, produced using natural raw materials: cement, water and wood fibres. These planks can create a beautiful contemporary or traditional look that will last a lifetime.

Key benefits

Choose from a range of colours
Cedral planks are available in a wide range of colours and can be placed both vertically and horizontally.
A full range of trims and accessories offers a complete system.
Let your creativity run free and give your house a personal colourful touch.

A durable facade
A Cedral facade helps to protect your home against the harshest weather conditions.
Cedral has excellent water, UV and frost resistant properties.
The fibre cement planks are also resistant to rot and immune to attack by fungi, bacteria, insects and vermin, ensuring your facade will stand the test of time.

Achieves a top fire rating
Did you know that our building materials have an excellent reaction to fire rating. Officially the classification is A2-s1,d0. Being part of the A group means our materials have no restriction on where they can be used, and in some countries can be considered as non-combustible. The s1 rating is the highest level of performance against generating smoke, while the d0 rating means that the material does not produce flaming droplets. In short they are non-flammable.

Perfect for renovation
Fibre cement cladding is the ideal material for the renovation of a facade. It will cover imperfections and protect newly installed insulation, resulting in a professionally finished aesthetic. The cladding is installed to the outside of your home ensuring minimal disruption during your renovation project.

Low maintenance
During production, the Cedral planks are coated with layers of UV resistant paint. The material is dimensionally stable and rot resistant, so does not require regular maintenance. Wash off occasionally with soapy water to help keep your facade looking as good as new.

Easy to install
The support structure for a Cedral facade is simple: vertical battens with a centre-to-centre distance of up to 60 cm. The Cedral range also includes colour matched trims and touch up paint to complete your facade beautifully.
Bespoke screws and clips ensure quick and easy installation, creating a flawless finish.

A durable facade

Cedral has excellent water, UV and frost resistant properties.
The fibre cement planks are also resistant to rot and immune to attack by fungi, bacteria, insects and vermin, ensuring your facade will stand the test of time.
Choose your finish

Do you want a timber effect or a flat, smooth facade?

All colours are available in a wood effect or a smooth, modern finish. Please refer to pages 12-13.
Will you go for **Lap** or **Click**?

**Cedral Lap**
Installed in a traditional shiplap style, giving your facade beautiful, deep shadow lines.

- Length: 3600 mm
- Width: 190 mm
- Thickness: 10 mm
- Weight per plank: 11.2 kg

**Cedral Click**
The Cedral Click facade is a flush fitting tongue and groove cladding board, providing a contemporary look to your house.

- Length: 3600 mm
- Width: 186 mm
- Thickness: 12 mm
- Weight per plank: 12.5 kg
Does **horizontal or vertical** suit your project best?

You can install Cedral Lap and Cedral Click horizontally and vertically, in a number of design options.

One colour **or with accents**?

With a Cedral facade, you have the freedom to create stand-out projects.

Cedral Board

Cedral Board is an impact resistant, durable and flat board, ideal for soffits and fascias. Cedral Board is available in 9 colours and in the following sizes:

- 2500mm x 200mm
- 2500mm x 400mm
- 2500mm x 300mm

- Cedral Click and Cedral Click Smooth standard factory-applied colour range.
- Not available for Cedral Click or Cedral Click Smooth.
- Cedral Click and Cedral Click Smooth may be subject to minimum order quantities and extended lead times.
- Cedral Board is available in these colours.
- Cedral Lap in Light Oak and Dark Oak is designed to mimic the appearance of stained natural wood and, as such, a variation in the colour and shade is part of the effect inherent in the material design.

The importance of ventilation

To ensure the best results and longevity of your facade, you must always have good ventilation. Use a perforated closure at the bottom and top of the facade, above doors and above and below windows.
